BASIC CONCEPT

What is a Chatbot?

Chatbot is an AI driven software that can communicate with your customers through email, chatbox, messenger, Skype, WhatsApp etc. with text or voice.

WHY CHATBOTS?

INCREASED CONNECTIVITY

Chatbot is available 24/7. Your customers get just in time response for their queries.

TECH-SAVVY CONSUMERS

Today's consumers want to interact more digitally. Chatbot will be a friend of them.

DATA-DRIVEN MARKET

Chatbot as a digital tool can make use of available data to scaleup revenue streams.

Market Overview

The chatbot market was valued at USD 17.17 billion in 2020 and is projected to reach USD 102.29 billion by 2026, registering a CAGR of 34.75% over the forecast period, 2021 - 2026. Virtual assistants are increasing because of deep neural networks, machine learning, and other advancements in AI technologies. Virtual assistants, such as chatbots and smart speakers, are used for various applications across several end-user industries, such as retail, BFSI, healthcare, etc.
